## **Faultless Diabetes**

The experts agree: finding out that your child has type 1 diabetes comes as a shock to most parents. Blood sugar levels, meters, shots, insulin, diet, exercise, hypoglycemia, complications, treatment plans, doctors, family: this is a whole lot of new challenges to cope with. No doubt your doctor and healthcare team have given you a lot of information and guidance about how to be a parent of a child with diabetes. Even with all this information about type 1 diabetes and your child, you are probably still experiencing a high level of anxiety about how best to support your child, both immediately and in the long run. Your concerns, your fears, are \"normal.\" Managing your child's diabetes is not just a medical challenge; diabetes causes severe stresses and strains that tax the psychological and emotional strengths of all those involved. This book provides parents with ten ideas focused on these psychological and emotional issues that ultimately consume a substantial share of your time and effort as a parent in helping your child manage his or her diabetes. These ideas have emerged as a result of listening to scores of parents as they cope with diabetes in their families. As each child is different, as is his or her diabetes, there is no single magic formula for living with diabetes, but we know some things you can expect to encounter as your child begins his or her life with diabetes. Being aware of these ideas may make it more comfortable for you as a parent, in part because you will find you are not alone in having a child with diabetes. There is much good news about the treatment of diabetes, information and tools that will be helpful to both you and your child as you manage this new life challenge! We encourage you to embrace these facts: Nothing you have done as a parent caused your child to get type 1 diabetes. Nothing! Nothing your child has done, or not done, caused him or her to get type 1 diabetes. Nothing!

Growing up with diabetes is not easy. There are lots of things children and their families find hard. Daily management tasks can become battle grounds and it can be an emotional roller coaster. Diabetes Counselling Online [www.diabetescounselling.com.au](http://www.diabetescounselling.com.au) is for all people living with all types of diabetes, their families and friends. Our aim is to connect people with diabetes and their families to a better quality of life. We understand that diabetes management goes hand in hand with your wellbeing. As a person living with type 1 diabetes since childhood and working in diabetes for many years, Helen Edwards wanted to offer families a resource which takes some of the stress and worry out of managing diabetes. Growing up with her own diabetes struggles, working as a social worker for 25 years and using play therapy in her practice; as well as having hundreds of conversations with families about their daily lives with diabetes, all led to the creation of Diabetes Dino®. We hope you and your child enjoy reading and playing with Diabetes Dino® and Dragon, and that they can help you to have a calmer, happier and healthier relationship with diabetes. Please use the Parent Guide to make the most of the book and our soft toys Dino and Dragon (coming by December 2014) and you can also contact our team for 1-1 email counselling, as well as group support and advice. Diabetes Counselling Online offers a diabetes virtual team that has been online since 2001, and which is personalised, professional and understanding. We are a not for profit, gift deductible charity with all proceeds of the sale of this book going towards help support our counselling programs to thousands of people each year. We greatly appreciate you help in maintaining the unique services for people with diabetes and their families.

## **Diabetic Diet for Kids**

Type 1 Diabetes and Babysitting: A Parent's Toolkit gives you the ability to fill in specific information about your child and thoroughly train your caregiver. Information such as: \* How to give shots \* What to do with a high or low blood sugar \* Troubleshooting pumps \* Meal and insulin planning Along with step-by-step instructions covering all aspects of your child's care, we've included pull-out pages for a babysitter and sleepovers. ~~~Overwhelmed. That's the feeling of a parent whose child has just been diagnosed with Type 1 diabetes. The days that follow are a blur of handouts, booklets, phone calls, notes scribbled after conversations with doctors and nurses. We stuff these papers into some sort of homemade binder or folder,

hoping they will cover all the bases of emergencies and critical situations. The worst possible scenarios are always in the back of our minds. We quickly become experts at diabetes care for our kid, and things like \"diabetic ketoacidosis\" and \"basal rates\" and \"rapid acting insulin\" don't give us pause. It hits us: how can we possibly feel comfortable leaving our child with anyone else besides a doctor, a nurse ... anyone medically trained? We're afraid to ask someone to watch our child because of the complex care involved. In reality, we are asking a lot. We are asking someone to be levelheaded enough to make decisions about a disease that is completely unpredictable. On the other hand, we want our kid to be \"normal\" and stay at a friend's house. As parents, we need and want to take a break, but when you're afraid of leaving your child in someone else's care, Date Night goes by the wayside. How do we navigate sleepovers, day care, play dates, and trips to Grandma's house? What if there was something geared toward a teen-aged sitter? Or a grandparent? Something in layman's terms that a person not immersed in the world of diabetes could understand? Type 1 Diabetes and Babysitting: A Parent's Toolkit is the only comprehensive guide available that is user friendly and completely adaptable to a child's specific needs. Julie Marmon, M.D. says, \"This book provides parents a method to convey crucial data and not worry that important details have been glossed over. The step-by-step instructions and flow charts with areas to personalize, streamline care and remove fear from a situation which may be scary for sitters and family members. Great work!\"

## **Diabetes in Children and Adolescents**

Written by individuals who between them currently share in the care of over 1,000 young diabetics, the book provides answers to the questions asked by parents and practical solutions to the problems confronting children, young people and their parents. In addition, suggestions and solutions are provided for professionals who are developing packages of care, audit systems, standards and activities outside the diabetic clinic. Special attention is given to the role of the paediatric diabetes nurse specialist and the purpose of the children's diabetic clinic, with particular strategies of care and examples of documentation being provided.
