inspect the between the pleats of this filter

pull the filter off

remove this belt housing

roll this o-ring off of the input shaft

pull the oil pump out

reverse piston return spring

push down on the piston a little bit

blow air pressure into this passage right there through the valve body

leave these six inner bolts out

big spring holding the sheave assembly

slide the bands out

take out this primary pulley

tap on this outer piston

replace these roller bearings

put these ball bearings back in place

using the arbor press

lift up on this pulley sheave a little

slide this primary sheave into place

push the case the rest of the way

rotate the piston

install my gear set
compress this balance piston down a little
flip it over finish putting the bolts in on our pulley
pull this whole electronic valve body and put it off to the side
check the resistance
take apart our main valve
prevent the end plug movement inboard by blocking the valve outboard
the torque converter clutch limit valve
apply my final torque
place the rest of the valve body bolts
oil cooler
line up this shift lever with the range sensor
seal on the input shaft for the torque converter
