This handbook explores contemporary Mormonism within a global context. The authors provide a nuanced picture of a historically American religion in the throes of the same kinds of global change that virtually every conservative faith tradition faces today. They explain where and how the Church of Jesus Christ of Latter-day Saints has penetrated national and cultural boundaries in Latin America, Oceania, Europe, Asia, and Africa, as well as in North America beyond the borders of Mormon Utah. They also address numerous concerns within a multinational, multicultural church: What does it mean to be a Latter-day Saint in different world regions? What is the faith's appeal to converts in these places? What are the peculiar problems for members who must manage Mormon identities in conjunction with their different national, cultural, and ethnic identities? How are leaders dealing with such issues as the status of women in a patriarchal church, the treatment of LGBTQ members, increasing disaffiliation of young people, and decreasing growth rates in North and Latin America while sustaining increasing growth in parts of Asia and Africa?

How to research, visit, evaluate, and join the ecovillage or sustainable community of your dreams. Finding community is as critical as obtaining food and shelter, since the need to belong is what makes us human. The isolation and loneliness of modern life have led many people to search for deeper connection, which has resulted in a renewed interest in intentional communities. These intentional communities or ecovillages are an appealing choice for like-minded people who seek to create a family-oriented and ecologically sustainable lifestyle—a lifestyle they are unlikely to find anywhere else. However, the notion of an intentional community can still be a tremendous leap for some—deterred perhaps by a misguided vision of eking out a hardscrabble existence with little reward. In fact, successful ecovillages thrive because of the combined skills and resources of their members. Finding Community presents a thorough overview of ecovillages and intentional communities and offers solid advice on how to research thoroughly, visit thoughtfully, evaluate intelligently, and join gracefully. Useful considerations include: Important questions to ask (of members and of yourself) Signs of a healthy (and not-so-healthy) community Cost of joining (and staying) Common blunders to avoid Finding Community provides intriguing possibilities to readers who are seeking a more cooperative, sustainable, and meaningful life. Diana Leafe Christian is the author of Creating a Life Together and editor of Communities magazine. She lives at Earthhaven Ecovillage in North Carolina.

Estimates indicate that as many as 1 in 4 Americans will experience a mental health problem or will misuse alcohol or drugs in their lifetimes. These disorders are among the most highly stigmatized health conditions

in the United States, and they remain barriers to full participation in society in areas as basic as education, housing, and employment. Improving the lives of people with mental health and substance abuse disorders has been a priority in the United States for more than 50 years. The Community Mental Health Act of 1963 is considered a major turning point in America's efforts to improve behavioral healthcare. It ushered in an era of optimism and hope and laid the groundwork for the consumer movement and new models of recovery. The consumer movement gave voice to people with mental and substance use disorders and brought their perspectives and experience into national discussions about mental health. However over the same 50-year period, positive change in American public attitudes and beliefs about mental and substance use disorders has lagged behind these advances. Stigma is a complex social phenomenon based on a relationship between an attribute and a stereotype that assigns undesirable labels, qualities, and behaviors to a person with that attribute. Labeled individuals are then socially devalued, which leads to inequality and discrimination. This report contributes to national efforts to understand and change attitudes, beliefs and behaviors that can lead to stigma and discrimination. Changing stigma in a lasting way will require coordinated efforts, which are based on the best possible evidence, supported at the national level with multiyear funding, and planned and implemented by an effective coalition of representative stakeholders. Ending Discrimination Against People with Mental and Substance Use Disorders: The Evidence for Stigma Change explores stigma and discrimination faced by individuals with mental or substance use disorders and recommends effective strategies for reducing stigma and encouraging people to seek treatment and other supportive services. It offers a set of conclusions and recommendations about successful stigma change strategies and the research needed to inform and evaluate these efforts in the United States.
