This is the first practical book dedicated to the fundamental and application aspects of two major unit operations in cocoa and coffee processing, namely drying and roasting. The drying and roasting of cocoa and coffee beans play critical roles in governing the formation of flavor precursors in the early stages and also the development of flavor and aroma in the later stages during processing. Hence, qualities of the finished chocolates and coffee powder products are affected greatly by the dried and roasted beans produced. Drying and Roasting of Cocoa and Coffee covers key topics areas ranging from post-harvest processing, equipment selection, physical and chemical changes during processing, flavor development, grading and dried product quality. The book consists of two parts with topics dedicated to the drying/roasting aspects of cocoa and coffee, respectively. Features Provides a comprehensive review on flavor development during cocoa/coffee processing Discusses the impact of processing parameters on cocoa/coffee quality Presents the new trends in drying/roasting techniques and novel technology Examines the concept of coffee quality in light of both paradigms: the traditional coffee and the specialty coffee grading systems No prior knowledge of cocoa and coffee processing is required to benefit from this book, which is written for a variety of readers. It is suitable for undergraduate and postgraduate students, researchers and industrial practitioners/consultants from various domains in the food and beverage industries.

## Catalog of Copyright Entries. Third Series

The introduction identifies this volume as the first in a multi-volume set; v.2 will cover the middle class, but after that, it's not clear what's planned. Volume 1 is a compendium focusing on the working class (which is nowhere defined). Each section deals with a decade and opens with a brief overview. Numerous reproductions of cartoons, advertisements, posters, and photographs of families, workers, and working conditions, as well as portions of magazine articles and quotations are interspersed with information about significant events of the decade and bits of social and economic information. Family profiles (74 in all) are fictional composites intended to represent the financial and social situations of families from an array of ethnic groups and occupations. The author's credentials are not identified, though he draws heavily on another of his works from the same publisher called The Value of a Dollar. Inexplicably, the volume lacks an index, making it more of a \"browse\" than a useful reference. Annotation copyrighted by Book News, Inc., Portland, OR
